### **... as employer, companion and opportunity opener!**

Become part of a leading global family business that manufactures soft, hard and special solders as well as other metal alloys for power electronics, renewable energies, optoelectronics, aerospace technology, medical technology and the automotive sector.

Have you found your calling in quality management and would you like to support us as a global player with your unique skills? Then become part of our great team and join us at the earliest possible date as...

### **Employee (m/f/d) in the Quality Management Department**

*Your tasks at PFARR?*

- Systematic and professional cooperation with quality management in the creation of quality-relevant documentation and the further development of existing processes
- Supporting quality management in the cross-departmental optimization of production processes from a QM perspective
- Processing complaints including the associated creation of 8D reports in close coordination with internal departments and customers
- Collecting and analyzing data from ERP databases with subsequent application of statistical evaluation methods
- Depending on qualifications, participation in audits, customer support and supplier development, including the associated documentation

*What PFARR offers you as an employer?*

- Secure and sustainable employment in a family-friendly company
- Varied tasks and personal support through mentoring in the onboarding process
- Flexible working hours and autonomous work in a motivated and open team
- Flat hierarchies and short decision-making paths for effective collaboration
- 30 days' vacation with additional special leave for special occasions
- Allowances for company pension schemes and childcare costs
- Free advice on professional and private matters through our employee support program (MUP)
- Modern, ergonomic workstations for healthy working conditions
- Attractive bike leasing offer - for environmentally friendly mobility
- Regular team and company events

*How do you add value to our team?*

- Completed technical qualification (degree, alternative technical training as a master craftsman, technician) with additional qualifications in the field of QA/QM
- Basic understanding in the application of the quality standard DIN EN ISO 9001 and ideally also IATF: 16949 or in the field of medical technology
- Familiarity with the automotive standards VDA 6.3 process audit, VDA volume 2/ PPAP, application of FMEA, 8D report or willingness to undergo further training
- Confident handling of ERP/ CAQ software and MS Office
- Independent pursuit of goals as well as team-oriented and communicative cooperation across departmental boundaries
- Strong sense of responsibility and a high degree of initiative
- Good written and spoken English skills
